INTERNET SAFETY

Presented by Amadou LY EFL/ ESP Teacher

Use *safe* websites.

BAMBEY UNIVERSITY

- **Learning outcomes:**
- By the end of the lesson learners will be able to:
- Talk about safe websides.
- Talk about personal information.
- Create personal account.

Answer the following questions

- (favourite food)What's your favourite food?
- (sisters or brothers) Do you have (any) brothers or brothers?
- (favourite website) What's your favourite website?
- (how often) How often do you surf the Internet?
- (when) When do you usually surf the Internet

Which Internet browser do you prefer? Why?
(e.g: Firefox, Safari, Chrome…..)

Have you ever made new friends on the Internet?
Talk about it.

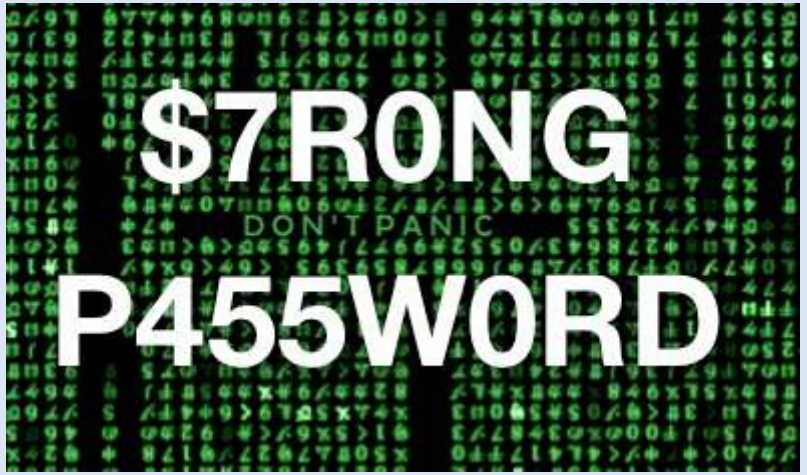

What are the most popular goods (and services) sold online?

Have you ever made new friends on the Internet?
Talk about it.

Have you ever used pirated software? Do you think it is okay to use it?

Create a strong *password*.

Create a Strong Password

As you create your password, remember the following:
It **should not** contain your name.
It **should not** contain a common dictionary word.
It **should** contain one or more numbers.
It **should** have both upper and lower case characters.
It **should** be over 8 characters long.
It **must** be different from your old passwords.

Okay

Don't share your password with anyone. (Except your *parents*)

Be careful with what you share.

Anything you post on the Internet can stay online *forever*.

Never give strangers your *personal information*.

(Address, phone number, likes&dislikes, daily routine etc.)

Think carefully before *uploading photos or videos* of yourself!
Strangers can download your photos and do anything *dangerous*.

Don’t make *online friends*.

Online friends *aren't real friends*.
***Never agree to meet* online friends.**

Tell your parents **if you see bad online behavior and if something makes you feel uncomfortable.**

***Don't be rude*. There is a real person on the other side and he/she has feelings, too.**

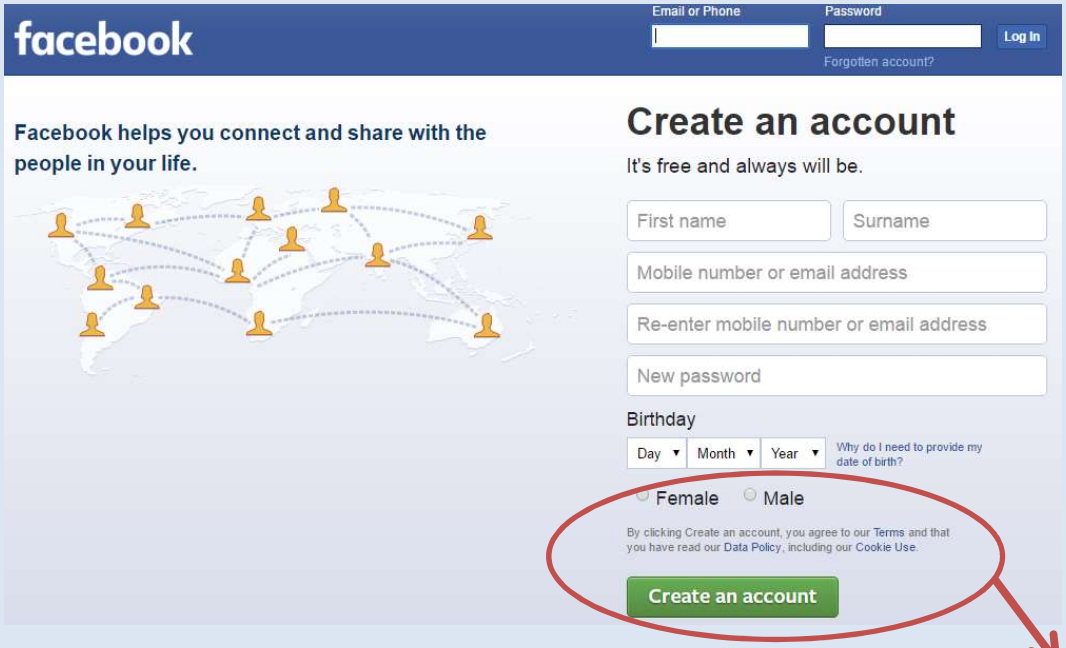

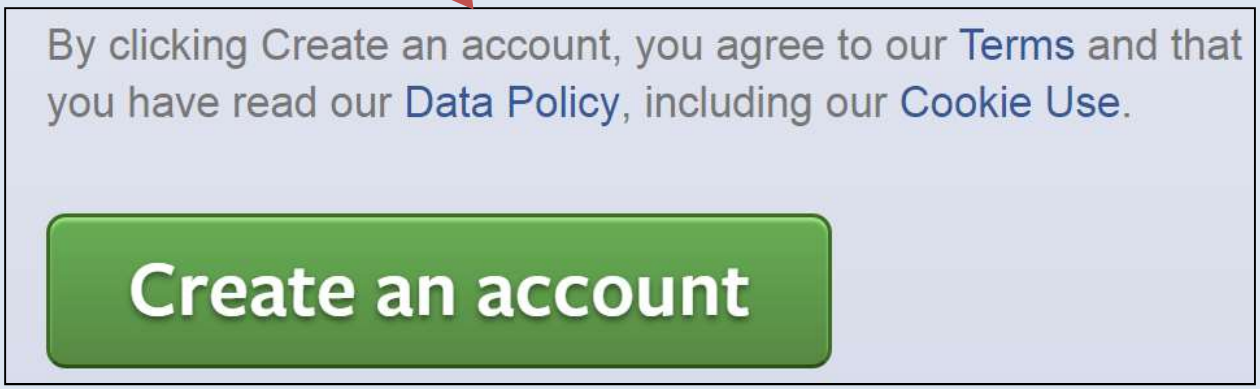

Be careful with what you *download*. Never open an attachment from someone you don't know. Attachments sometimes contain viruses.

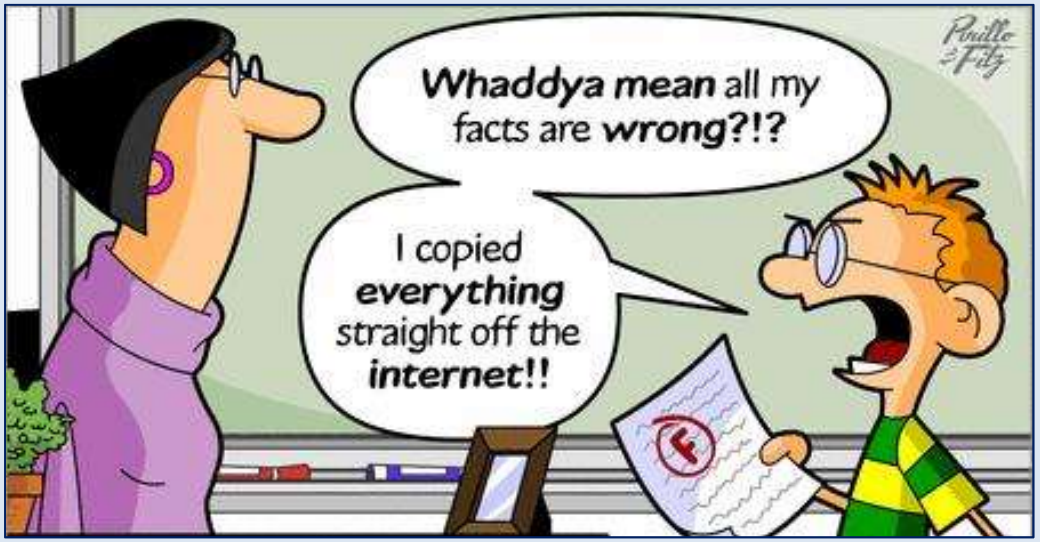

Don’t forget! You are responsible for everything you do on social networking sites.

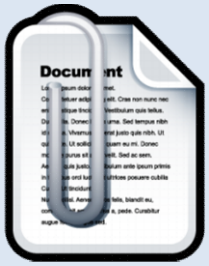

The Internet is a good source of information, but *there is a lot of false information* on the Net.
Don't believe everything you see on the Net.

Let's check your vocabulary about the Internet!
